Coolings Installation Service

From Only £199

What is the installation service?

Coolings professional installers will set up the mower in the best position in your garden, and connect it to your homes exterior plug unit.

Additionally, we will install an underground wire around the border of your lawn, that tells your robotic mower where your lawn ends and your flower beds begin. This is a 3mm thick radio frequency wire buried around the perimeter of your lawn, and using our specialist equipment, we can install this with barely any visible damage to your lawn.

What is the cost?

LAWN AREA	INSTALLATION COST
Up to 2000m ²	£449
Up to 1000m ²	£399
Up to 500m ²	£349
Up to 100m ²	£199

What's included?

- Installation of your new mower and it's base station
- Laying the boundary wire around your lawn
- Testing the mower
- Provide training on how your new mower works

If you are unsure on the size of your lawn, please ask for a no obligation installation quote. Prices may vary depending on complexity of lawn.

Quotes for lawns larger than 2000m² are available on request.

FOR YOUR FREE MOWER CONS

Step 3

Choose your Mower Care+ Package

Continued support after your install

With Coolings Mower Care+ we will provide telephone support, repairs (if required) and an annual service.

As robot mowers cannot be left in temperatures below 4°C, we'll collect and store the mower in a heated storage facility for the winter months also.

Without a fully entacted boundary wire, the robot will stop functioning properly. So, any accidental damage to the mower boundary cable is also covered under Mower Care+. In the event of accidental damage to the cable, we'll visit your property and make repairs - All included in your Mower Care+ subscription*

Why do robot lawn mowers need servicing?

Like all lawn mowers, robotic lawn mowers need to be serviced and maintained annually. Components require cleaning, blades need sharpening or replacing, and software needs updating. Mower Care+ makes maintenance of your mower hassle free. Coolings will collect, service and return your mower as part of your Mower Care+ subscription.

Lawn Care Packages

In addition to the benefits included in Coolings Mower Care+, Platinum Care includes preferential rates for lawn treatments by our professional team. Coolings will visit your lawn and apply treatments to keep the lawn in best condition possible.

We use robot mower specific feeds which are organic, carbon neutral, and also child and pet friendly. You can even chose to have a scarifying treatment included in the monthly cost too.
